

SumOfTwoNumber.javaAge.java

FileEditView

```
import java.util.Scanner;
public class Age{
    public static void main(string[] args){
        Scanner sc = new Scanner (System.in );
        System.out.println("Enter Age:");
        int age =sc.nextInt();
        String result= (age<18)?"Minor":(age<50)?"Adult":"Senior";
        System.out.println(result);
    }
}
```

C:\Windows\System32\cmd.e

+

C:\Users\nikhi\OneDrive\Desktop\lgb>javac Age.java

C:\Users\nikhi\OneDrive\Desktop\lgb>java Age.java

Enter Age:

25

Adult

C:\Users\nikhi\OneDrive\Desktop\lgb>javac Age.java

C:\Users\nikhi\OneDrive\Desktop\lgb>java Age.java

Enter Age:

13

Minor

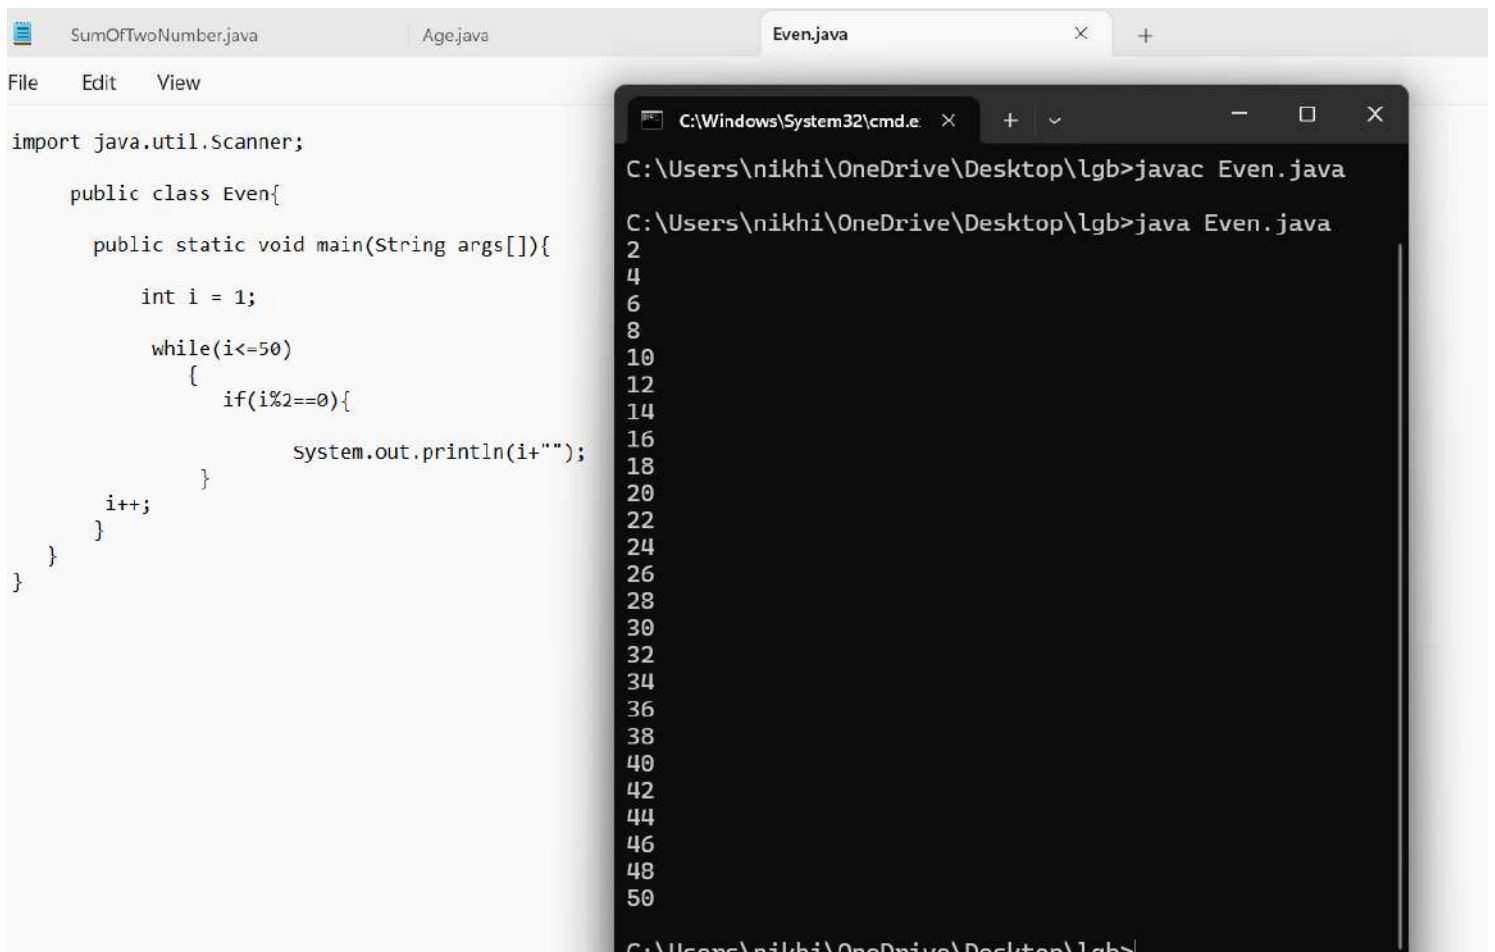

C:\Users\nikhi\OneDrive\Desktop\lgb>javac Age.java

C:\Users\nikhi\OneDrive\Desktop\lgb>java Age.java

Enter Age:

75

Senior

The image shows a Java IDE window with three tabs: 'SumOfTwoNumber.java', 'Age.java', and 'Even.java'. The 'Even.java' tab is active, displaying the following code:

```
import java.util.Scanner;

public class Even{

    public static void main(String args[]){

        int i = 1;

        while(i<=50)
        {
            if(i%2==0){

                System.out.println(i+"");

            }

            i++;

        }

    }

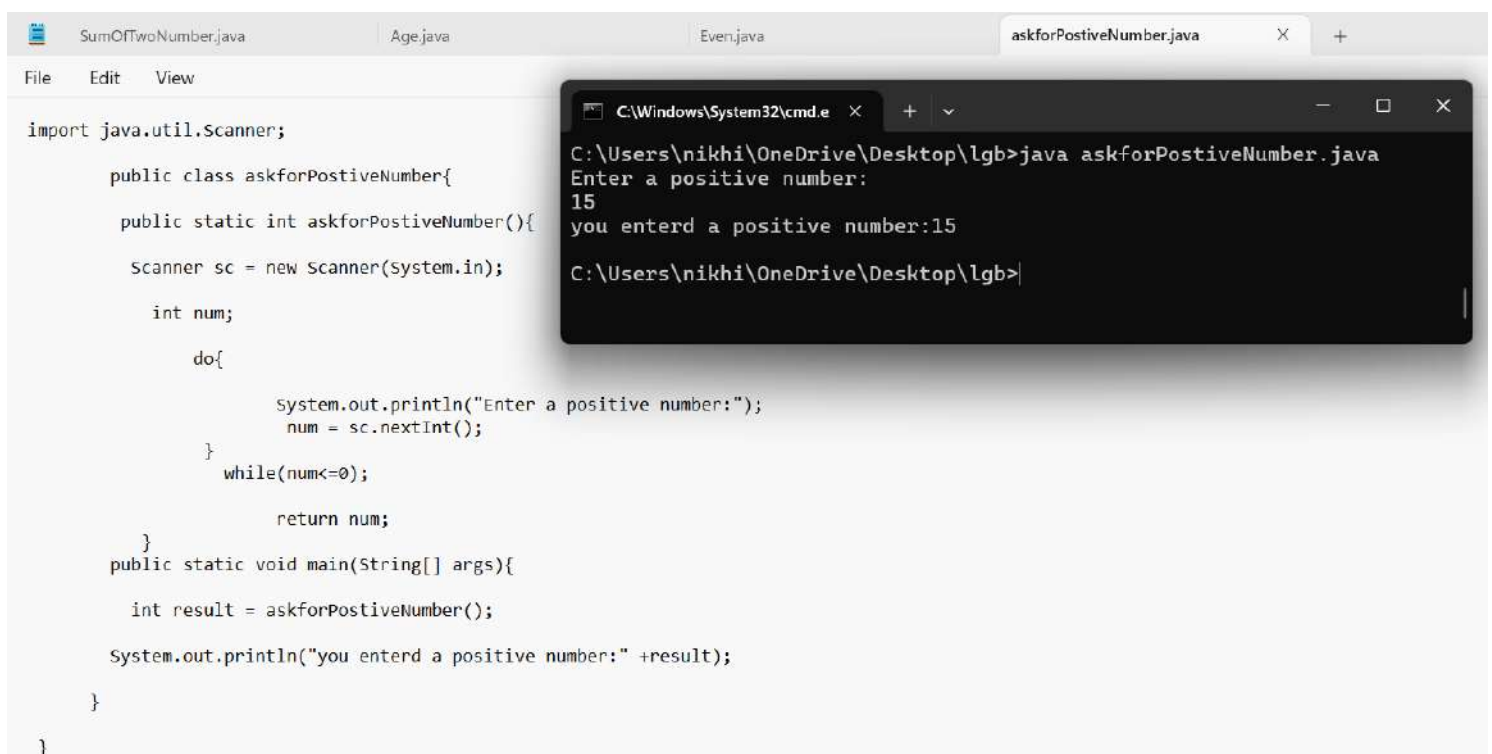

}
```

Overlaid on the IDE is a Windows command prompt window with the title 'C:\Windows\System32\cmd.e'. It shows the following commands and output:

```
C:\Users\nikhi\OneDrive\Desktop\lgb>javac Even.java

C:\Users\nikhi\OneDrive\Desktop\lgb>java Even.java

The image shows a screenshot of a Java IDE with four tabs: SumOfTwoNumber.java, Age.java, Even.java, and askforPostiveNumber.java. The askforPostiveNumber.java tab is active, displaying the following code:

```
import java.util.Scanner;

public class askforPostiveNumber{

    public static int askforPostiveNumber(){

        Scanner sc = new Scanner(System.in);

        int num;

        do{

            System.out.println("Enter a positive number:");
            num = sc.nextInt();

        } while(num<=0);

        return num;

    }

    public static void main(String[] args){

        int result = askforPostiveNumber();

        System.out.println("you entered a positive number:" +result);

    }

}
```

Overlaid on the IDE is a Windows command prompt window titled "C:\Windows\System32\cmd.e". It shows the execution of the Java program:

```
C:\Users\nikhi\OneDrive\Desktop\lgb>java askforPostiveNumber.java
Enter a positive number:
15
you entered a positive number:15
C:\Users\nikhi\OneDrive\Desktop\lgb>
```

The image shows a screenshot of a Java IDE with four tabs: SumOfTwoNumber.java, Age.java, Even.java, and askforPostiveNumber.java. The askforPostiveNumber.java tab is active, displaying the following code:

```
import java.util.Scanner;

public class askforPostiveNumber{

    public static int askforPostiveNumber(){

        Scanner sc = new Scanner(System.in);

        int num;

        do{

            System.out.println("Enter a positive number:");
            num = sc.nextInt();
            if(num<=0)
                System.out.println("Invalid Input!Please enter postive number:");

        } while(num<=0);

        return num;

    }

    public static void main(String[] args){

        int result = askforPostiveNumber();

        System.out.println("you enterd a positive number:" +result);

    }

}
```

Overlaid on the IDE is a Windows Command Prompt window with the title "C:\Windows\System32\cmd.e". It shows the execution of the Java program:

```
C:\Users\nikhi\OneDrive\Desktop\lgb>java askforPostiveNumber.
java
Enter a positive number:
-8
Invalid Input!Please enter postive number:
Enter a positive number:
6
you enterd a positive number:6

C:\Users\nikhi\OneDrive\Desktop\lgb>
```

The image shows a code editor with several tabs: SumOfTwoNumber.java, Age.java, Even.java, askforPostiveNumber.java, MultiplicationTable.java, and SumOfn.java. The SumOfn.java tab is active, displaying the following Java code:

```
import java.util.Scanner;
public class SumOfn{

    public static void main(String[] args){

        Scanner sc =new Scanner(System.in);

        System.out.println("Enter a number:");

        int n = sc.nextInt();

        int sum = 0;

        for(int i=1;i<=n;i++){

            sum = sum +i;

        }
        System.out.println(" Sum from 1 to " + n + " is" + sum);

    }
}
```

Overlaid on the bottom right is a terminal window titled "C:\Windows\System32\cmd.e". It shows the compilation and execution of the program:

```
C:\Users\nikhi\OneDrive\Desktop\lgb>javac SumOfn.java
C:\Users\nikhi\OneDrive\Desktop\lgb>java SumOfn.java
Enter a number:
5
Sum from 1 to 5 is 15
C:\Users\nikhi\OneDrive\Desktop\lgb>
```
